

SO CONNECT+ syringe pump

SO CONNECT+ is an ambulatory infusion pump dedicated to controlled subcutaneous administration of Immunoglobulins and Deferoxamine.

It uses 20mL, 30mL and 50mL single-use drugbiocompatible sterile syringe SO-FILL exclusively. One SO CONNECT+ pump is compatible with all these syringe volumes. Healthcare professionals in a clinical environment and users (patients or medical staff) at home are using the SO CONNECT+ pump, which is intended to simplify treatment and ensure patient safety.

User-friendly: resistive touchscreen

Safe: display lock for settings & configurations

Bluetooth connection for transmission of clinical data

Clinical monitoring smartphone app

Smart: simplified infusion management allows configuration of mono and multi-flowrate

Subcutaneous immunoglobulin and desferal infusion pump
