

CA-500 mm/h syringe pump

CA-500 is a portable, intuitive syringe pump ideal for delivery of medications and fluids in small volume and low rate. With a comprehensive range of features, the pump is suitable for infusion therapy across a wide variety of applications in inpatient, outpatient and home care environments.

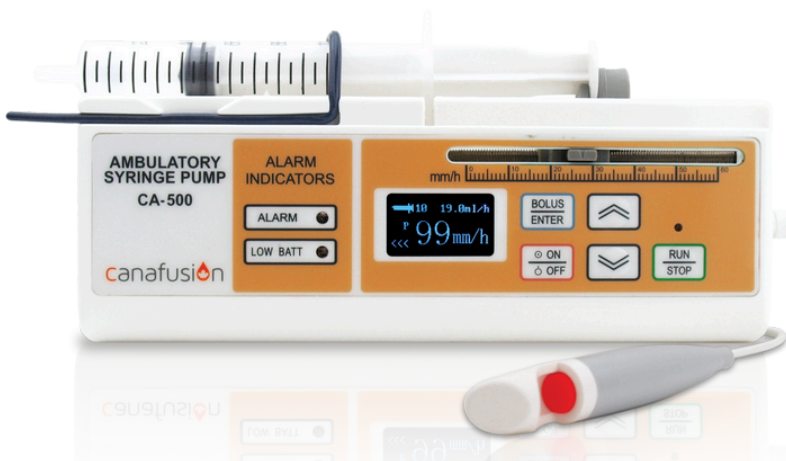

Lightweight and compact, completely portable and easy to carry in a custom-designed carrying bag.

Adapts to syringe sizes from 1 ml to 20 ml by major manufacturers.

Digital programming with a bright OLED display, which is especially easy to read in high or low light conditions.

Audible alarms with display messaging and flashing beacon provides comprehensive protection.

Intuitive PCA function allows patients to add extra dosage for quick relief of pain at the simple click of a button.
