

CA-700 syringe pump

CA-700 is a portable, intuitive syringe pump ideal for delivery of medications and fluids in small volume and low rate. With a comprehensive range of features, the pump is suitable for infusion therapy across a wide variety of applications in inpatient, outpatient and home care environments.

The tailored docking station has centralized charging, available in 2, 4 and 6 modules. The pump can be rotated 90 degrees for different drug treatments, has full alarm protection, and its lithium battery powers the pump up to 24 hours.

Intended use

Intravenous
Subcutaneous
Intra-arterial

Features

Detects automatically 5 ml, 10 ml, 20/30 ml, and 50/60 ml syringes from major brands (open system)

Wide range flow rate from 0.1 to 1000 ml/h

Flexible infusion modes: ml/h, time/volume and weigh mode

Enhanced safety by using drug library, reducing the risk of over dose, memory can store up to 120 drug dosing protocols
