

# BodyGuard 595 Color Vision

The BodyGuard 595 ColorVision™ is designed to meet your various clinical requirements. It will help you manage various post-operative pain-management methods, provide the additional safety you seek, and support your goal of improving patient outcomes.

A range of epidural sets with yellow strip line differentiated from PCA sets (clear or blue strip line) helps prevent the IV line mixing with other routes of administration (i.e. epidural and peripheral routes when using local anesthetics).

## Intelligent Programmed Interval AutoBolus (PiAB™)

Furthermore, the new Intelligent PiAB™ doses have been designed to optimize pain relief during childbirth to expedite patient pain relief, with limited clinician intervention.

## Intended use

Intravenous  
Subcutaneous  
Epidural  
Regional  
Wound infiltration

## Applications

PCA  
Labor and delivery  
Post operative pain management  
Chronic pain management
